Proposal ID XXXXXXXXX

Acronym XXXXXXX

Structure of the Proposal

The proposal contains two parts:

- Part A of the proposal is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal. The participants can update the information in the submission system at any time before final submission.
- Part B of the proposal is the narrative part that includes three sections that each correspond to an evaluation criterion. Part B needs to be uploaded as a PDF document following the templates downloaded by the applicants in the submission system for the specific call or topic. The templates for a specific call may slightly differ from the example provided in this document.

The electronic submission system is an online wizard that guides you step-by-step through the preparation of your proposal. The submission process consists of 6 steps:

- Step 1: Logging in the Portal
- Step 2: Select the call, topic and type of action in the Portal
- Step 3: Create a draft proposal: Title, acronym, summary, main organisation and contact details
- Step 4: Manage your parties and contact details: add your partner organisations and contact details.
- Step 5: Edit and complete web forms for proposal part A and upload proposal part B
- Step 6: Submit the proposal
- Instructions and footnotes in green will not appear in the text generated by the IT system.
- For options [in square brackets]: the option that applies will be automatically shown in the IT system (Part A) or included in the template of Part B offered by the IT system or you must select the appropriate value from a predefined list.
- For fields in [grey in square brackets] (even if they are part of an option as specified in the previous item): enter the appropriate data in the IT system.
- Data in coloured fields will be prefilled by the IT tool.

Declarations

These declarations can be filled in by any coordinator contact(s). All declarations are mandatory.

1)	We declare to have the explicit consent of all applicants on their participation and on the content of this proposal.	
2)	We confirm that the information contained in this proposal is correct and complete and that none of the project activities have started before the proposal was submitted (unless explicitly authorised in the call conditions).	
3)	We declare: - to be fully compliant with the eligibility criteria set out in the call - not to be subject to any exclusion grounds under the <u>EU Financial Regulation 2018/1046</u> - to have the financial and operational capacity to carry out the proposed project.	
4)	We acknowledge that all communication will be made through the Funding & Tenders Portal electronic exchange system and that access and use of this system is subject to the <u>Funding & Tenders Portal Terms & Conditions</u> .	
5)	We have read, understood and accepted the <u>Funding & Tenders Portal Terms & Conditions</u> and <u>Privacy Statement</u> that set out the conditions of use of the Portal and the scope, purposes, retention periods, etc. for the processing of personal data of all data subjects whose data we communicate for the purpose of the application, evaluation, award and subsequent management of our grant, prizes and contracts (including financial transactions and audits).	
6)	We declare that the proposal complies with ethical principles (including the highest standards of research integrity as set out in the <u>ALLEA European Code of Conduct for Research Integrity</u> , as well as applicable international and national law, including the Charter of Fundamental Rights of the European Union and the European Convention on Human Rights and its Supplementary Protocols. <u>Appropriate procedures, policies and structures</u> are in place to foster responsible research practices, to prevent questionable research practices and research misconduct, and to handle allegations of breaches of the principles and standards in the Code of Conduct.	
7)	We declare that the proposal has an exclusive focus on civil applications (activities intended to be used in military application or aiming to serve military purposes cannot be funded). If the project involves dual-use items in the sense of Regulation 2021/821 , or other items for which authorisation is required, we confirm that we will comply with the applicable regulatory framework (e.g. obtain export/import licences before these items are used).	
8)	 We confirm that the activities proposed do not aim at human cloning for reproductive purposes; intend to modify the genetic heritage of human beings which could make such changes heritable (with the exception of research relating to cancer treatment of the gonads, which may be financed), or intend to create human embryos solely for the purpose of research or for the purpose of stem cell procurement, including by means of somatic cell nuclear transfer. lead to the destruction of human embryos (for example, for obtaining stem cells) 	
The	ese activities are excluded from funding.	
9)	We confirm that for activities carried out outside the Union, the same activities would have been allowed in at least one EU Member State	
10)	[Additional option for LUMP SUM Grants: For Lump Sum Grants with a detailed budget table: We understand and accept that the EU lump sum grants must be reliable proxies for the actual costs of a project and confirm that the detailed budget for the proposal has been established in accordance with our usual cost accounting practices and in compliance with the basic eligibility conditions for EU actual cost grants (see <u>AGA — Annotated Grant Agreement, art 6</u>) and exclude costs that are ineligible under the Programme. Purchases and subcontracting costs must be done taking into

account best value for money and must be free of conflict of interest.]

The coordinator is only responsible for the information relating to their own organisation. Each applicant remains responsible for the information declared for their organisation. If the proposal is retained for EU funding, they will all be required to sign a declaration of honour.

False statements or incorrect information may lead to administrative sanctions under the EU Financial Regulation.

2 - Participants

List of participating organisations

#	Participating Organisation Legal Name	Country
1		
2		
3		

Coordinator contacts have the rights to:

- add, delete, edit and re-order partners in the consortium
- add, delete, edit and re-order contact points for those organisations
- edit all sections of the administrative forms
- upload, delete, view and download Part B and Annexes (when required for the call)
- submit the proposal

Participant contacts may:

- view all the information in this screen, but not edit it
- edit only the section for their organisation in the administrative forms (including budget)
- view the entire administrative forms
- view/download the Part B and other Annexes

You can manage the list of organisations and access rights of persons at Step 4 of the submission process. You may identify and give access to as many contact persons of the selected organisations as you wish. The identification is based upon the e-mail address of the person. When you add a contact person, you will be prompted to supply the contact details, name, e-mail, phone.

Person in charge of the proposal (main contact person): Each organisation needs to have one main contact person identified; the main contact person will have to fill in full contact details in the administrative form. The 'Main Contact Person' for the coordinating organisation (Participant no. 1) will become the primary contact person for the Services. Other contact persons may also be identified and may receive read-only or full access rights. Contact persons with full access rights of the coordinator (Participant no. 1) will be called 'Coordinator contacts' in the Funding & Tenders Portal, while for the other participants 'Participant Contacts'; contact persons with read-only rights will be called 'Team Members'. Other contact persons are listed with basic details in the administrative form.

Access rights: The main contact person and contact persons of the coordinator with full access rights have the same level of rights: they can manage the list of participants and contacts, edit any part of the administrative part of the proposal and upload any attachments (eg. Part B - technical description), and submit the proposal. Contact persons with read-only rights can only view/download the information. Participant contacts with full access rights can only edit their section of the administrative form and view all proposal data.

Access rights can be revoked by the Coordinating Organisation contacts. The person who created the proposal cannot be deleted.

<u>Invitation</u>: All contacts will receive an e-mail and a notification to the Portal about the invitation to the proposal upon saving the data at Step 4 of the submission process.

Researchers involved in the proposal

Include only the researchers involved in the proposal, (see below definition of 'researcher'). You do not need to include in the table the identity of other persons involved in the proposal who are not researchers.

'Researchers are professionals engaged in the conception or creation of new knowledge. They conduct research and improve or develop concepts, theories, models, techniques instrumentation, software or operational methods. (Frascati Manual 2015)'

Include also person in charge of the proposal if a researcher.

Title	First Name	Last Name	Gender	Nationality	E-mail	Career stage ¹	Role of researcher (in the project)	Reference Identifier	Type of identifier
			[Woman]			[Category A – Top grade researcher]	[Leading]		[ORCID]
			[Man]			[Category B – Senior	[Team member]		[Researcher Id]
			[Non-binary]			researcher]			Other -
					*0	[Category C – Recognised researcher]			specify]
					Ď.	[Category D – First stage researcher]			
				- 0.1					

Category D – First stage researcher: Either doctoral students at the IsCED level 8 who are engaged as researchers, or researchers working in posts that do not normally require a doctorate degree. Examples: 'PhD students' or 'junior researchers' (without a PhD).

Version of template used Page 11 of 24 Last saved dd/mm/yyyy HH:mm

¹ Career stages as defined in Frascati 2015 manual:

Category A – Top grade researcher: the single highest grade/post at which research is normally conducted. Example: 'Full professor' or 'Director of research'.

Category B – Senior researcher: Researchers working in positions not as senior as top position but more senior than newly qualified doctoral graduates (IsCED level 8). Examples: 'associate professor' or 'senior researcher' or 'principal investigator'.

Category C – Recognised researcher: the first grade/post into which a newly qualified doctoral graduate would normally be recruited. Examples: 'assistant professor', 'investigator' or 'post-doctoral fellow'.

Role of participating organisation in the project Applicants may select more than one option.		Definitions
Project management		Click if your organisation will do project management activities (i.e. assigning the tasks, reporting and interface with the EC). These tasks are normally carried out by the coordinator, but other participants can also contribute.
Communication, dissemination and engagement		Click if your organisation will be in charge of communication, dissemination and engagement. This can be centralised by one partner or split across the partners.
Provision of research and technology infrastructure		Click if your organisation is providing a research facility or research equipment.
Co-definition of research and market needs		Click if your organisation will be involved in the co-defining the research and market needs. Usually it is a company that intends to later use the research results, or a NGO that will use the solution. This will help the project further tailor its results to respond to specific needs of the end user.
Civil society representative		Click if your organisation belongs to civil society (NGO, association, organisation, consumer group, community group, charity, etc.).
Policy maker or regulator, incl. standardisation body		Click if your organisation is a policy maker (local, regional, national, European level), regulator or a standardisation body.
Research performer		Click if your organisation is in charge of performing the research during the project.
Technology developer		Click if your organisation is in charge of developing the technology during or after the project.
Testing/validation of approaches and ideas		Click if your organisation is in charge of testing/validating the approach and ideas.
Prototyping and demonstration		Click if your organisation is in charge of developing the prototypes and performing demonstrations.
IPR management incl. technology transfer		Click if your organisation is in charge of IPR management including technology transfer at the end of the grant.
Public procurer of results		Click if your organisation (public authority, hospital, university, local government, etc) will be using the results afterwards.
Private buyer of results		Click if your organisation (from the private sector) will be using the results afterwards.
Finance provider (public or private)	× D	Click if your organisation will be providing the financing for the exploitation during or after the end of the project.
Education and training		Click if your organisation is in charge of educating and training researchers.
Contributions from the social sciences or/and the humanities		Click if your organisation is in charge of contributing to the social sciences or/and the humanities dimension to the research projec.t
Other Specify (50 character limit):		

List of up to 5 publications, widely-used datasets, software, goods, services, or any other achievements relevant to the call content.

Type of achievement	Short description
[Publication] [Dataset]	Key elements of the achievement, including a short qualitative assessment of its impact and (where available) its digital object identifier (DOI) or other type of persistent identifier (PID).
[Software]	Publications, in particular journal articles, are expected to be open access. Datasets are expected to be FAIR and 'as open as possible, as closed as necessary'.

4 - Ethics and Security

Ethics issues table

This table should be completed as an essential part of your proposal. Please go through the table and indicate which elements concern your proposal by answering 'Yes' or 'No'. If you answer 'Yes' to any of the questions,

- indicate in the adjacent box at which page in your full proposal further information relating to that ethics issue can be found, and
- provide additional information on that ethics issue in the Ethics Self-Assessment section.

For more information on each of the ethics issues and how to address them, including detailed legal references, see the guidelines 'How to Complete your Ethics Self-Assessment'.

ETHICS SELF-ASSESSMENT

If you have entered any issues in the ethics issue table, you must perform an ethics self-assessment in accordance with the guidelines "How to Complete your Ethics Self-Assessment" and complete the table below.

Ethical dimension of the objectives, methodology and likely impact

Explain in detail the identified issues in relation to:

- objectives of the activities (e.g. study of vulnerable populations, etc.)
- methodology (e.g. clinical trials, involvement of children, protection of personal data, etc.)
- the potential impact of the activities (e.g. environmental damage, stigmatisation of particular social groups, political or financial adverse consequences, misuse, etc.)

Compliance with ethical principles and relevant legislations

Describe how the issue(s) identified in the ethics issues table above will be addressed in order to adhere to the ethical principles and what will be done to ensure that the activities are compliant with the EU/national legal and ethical requirements of the country or countries where the tasks are to be carried out. It is reminded that for activities performed in a non-EU countries, they should also be allowed in at least one EU Member State.

Application Forms	
Proposal ID XXXXXXXXX	Acronym XXXXXXX

Security issues table

Please go through the table and indicate which elements concern your proposal by answering YES or NO. If you answer YES to any of the questions:

- indicate in the adjacent box at which page in your full proposal further information relating to that security issue can be found, and
- provide additional information on this security issue in the Security self-assessment section below.

For more information on potential security issues and how to address them, see the guidance <u>How to handle security-sensitive projects</u> and the programme-specific guidelines <u>Classification of information in Horizon Europe projects</u>.

1. EU classified information (EUCI) ²				
Does this a	ctivity involve information and/or materials requiring protection against unauthorised EUCI)?	O Yes O No		
If YES : Is the activity going to use classified information as background ³ information?		Yes O No		
	Is the activity going to generate EU classified foreground ⁴ information as results?	O Yes O No		
Does this activity involve participants from non-EU countries which need to have access to EUCI?				
If YES:	S: Do the non-EU countries concerned have a security of information agreement with the EU?			
2. MISUSE				
Does this activity have the potential for misuse of results?				
	Does the activity provide knowledge, materials and technologies that could be channelled into crime and/or terrorism?	O Yes O No		
	Could the activity result in the development of chemical, biological, radiological or nuclear (CBRN) weapons and the means for their delivery?	OYes ONo		
3. OTHER SECURITY ISSUES			Page	
Does this activity involve information and/or materials subject to national security restrictions?				
If yes, please specify: (Maximum number of characters allowed: 1000)

² According to the Commission Decision (EU, Euratom) 2015/444 of 13 March 2015 on the security rules for protecting EU classified information, "European Union classified information (EUCI) means any information or material designated by an EU security classification, the unauthorised disclosure of which could cause varying degrees of prejudice to the interests of the European Union or of one or more of the Member States".

³ Classified background information is information that is already classified by a country and/or international organisation and/or the EU and is going to be used by the project. In this case, the project must have in advance the authorisation from the originator of the classified information, which is the entity (EU institution, EU Member State, third state or international organisation) under whose authority the classified information has been generated.

⁴ EU classified foreground information is information (documents/deliverables/materials) planned to be generated by the project and that needs to be protected from unauthorised disclosure. The originator of the EUCI generated by the project is the European Commission.

Horizon Europe Programme

Standard Application Form (HE EIC PATHFINDER CHALLENGES)

Project proposal – Technical description (Part B)

Version 3.4 12 June 2024

Structure of the Proposal

The proposal contains two parts:

- Part A of the proposal is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal. The participants can update the information in the submission system at any time before final submission.
- Part B of the proposal is the narrative part that includes three sections that each correspond to an evaluation
 criterion. Part B needs to be uploaded as a PDF document following the templates downloaded by the applicants in
 the submission system for the specific call or topic. The templates for a specific call may slightly differ from the
 example provided in this document.

The electronic submission system is an online wizard that guides you step-by-step through the preparation of your proposal. The submission process consists of 6 steps:

- Step 1: Logging in the Portal
- Step 2: Select the call, topic and type of action in the Portal
- Step 3: Create a draft proposal: Title, acronym, summary, main organisation and contact details
- Step 4: Manage your parties and contact details: add your partner organisations and contact details.
- Step 5: Edit and complete web forms for proposal part A and upload proposal part B
- Step 6: Submit the proposal

	HISTORY OF CHANGES			
Version	Publication date	Changes		
1.0	15.06.2021	Initial version		
2.0	15.06.2022	 Changes in tables on section 3 avoiding duplication of information Reorder of points in 'Impact' section Adapted to EIC Work Programme 2022 		
3.0	11.07.2022	Consolidation, formatting and layout changes. Tags added		
3.1	08.09.2022	Added instructions on Artificial intelligence		
3.2	05.06.20223	 Modification of section 2.2 to align with the 2023 Pathfinder Open proposal template Criterion 3: Allocation of resources sub-criterion modified Inversion of order for sections 3.1 and 3.2 Update of title and description for section 3.2 to include more clearly monobeneficiary application Technical description added at the end of the document 		
3.3	18.03.2024	 Guidance on the use of generative AI tools for preparation of proposals. Additional information on how to describe the activities per work package. 		
3.4	12.06.2024	 Adaptations to WP 2024: Change of page limits Criterion 2: Innovation potential, sub-criterion modified Criterion 3: Quality of the consortium sub-criterion modified Additional information on industrial/commercial involvement in the project to ensure exploitation of the results Modification of Table 3.1a Addition of detailed budget table in the list of Annexes. 		

Proposal template Part B: technical description

The structure of this template must be followed when preparing your proposal. It has been designed to ensure that the important aspects of your planned work are presented in a way that will enable the experts to make an effective assessment against the evaluation criteria. Sections 1, 2 and 3 each correspond to an evaluation criterion.

Please be aware that proposals will be evaluated as they were submitted, rather than on their potential if certain changes were to be made. This means that only proposals that successfully address all the required aspects will have a chance of being funded. There will be no possibility for significant changes to content, budget and consortium composition during grant preparation.

Page limit: The sections 1, 2 and 3, together, should not be longer than 30 pages. All tables, figures, references and any other element pertaining to these sections must be included as an integral part of these sections and are thus counted against this page limit.

The page limit will be applied automatically; therefore, you must remove this instruction page before submitting. Remove also the table with the definition of terms and the help text added after each section.

If you attempt to upload a proposal longer than the specified limit before the deadline, you will receive an automatic warning and will be advised to shorten and re-upload the proposal. After the deadline, excess pages (in over-long proposals/applications) will be automatically made invisible and will not be taken into consideration by the experts. The proposal is a self-contained document. Experts will be instructed to ignore hyperlinks to information that is specifically designed to expand the proposal, thus circumventing the page limit.

Please, do not consider the page limit as a target! It is in your interest to keep your text as concise as possible, since experts rarely view unnecessarily long proposals in a positive light.

The page limit will be applied automatically. At the end of this document you can see the structure of the actual proposal that you need to submit, please remove all instruction pages that are watermarked.

The following formatting conditions apply.

The reference font for the body text of proposals is Times New Roman (Windows platforms), Times/Times New Roman (Apple platforms) or Nimbus Roman No. 9 L (Linux distributions).

The use of a different font for the body text is not advised and is subject to the cumulative conditions that the font is legible and that its use does not significantly shorten the representation of the proposal in number of pages compared to using the reference font (for example with a view to bypass the page limit).

The minimum font size allowed is 11 points. Standard character spacing and a minimum of single line spacing is to be used. This applies to the body text, including text in tables.

Text elements other than the body text, such as headers, foot/end notes, captions, formula's, may deviate, but must be legible.

The page size is A4, and all margins (top, bottom, left, right) should be at least 15 mm (not including any footers or headers).

This document is tagged. Do not delete the tags; they are needed for our internal processing of information, mostly for statistical gathering. In that light, please do not move, delete, re-order, alter tags in any way, as they might create problems in our internal processing tools. Tags do not affect or influence the outcome of your application.

	DEFINITIONS
Critical risk	A critical risk is a plausible event or issue that could have a high adverse impact on the ability of the project to achieve its objectives.
	Level of likelihood to occur (Low/medium/high): The likelihood is the estimated probability that the risk will materialise even after taking account of the mitigating measures put in place.
	Level of severity (Low/medium/high): The relative seriousness of the risk and the significance of its effect.
Deliverable	A report that is sent to the Commission or Agency providing information to ensure effective monitoring of the project. There are different types of deliverables (e.g. a report on specific activities or results, data management plans, ethics or security requirements).
Impacts	Wider long term effects on society (including the environment), the economy and science, enabled by the outcomes of R&I investments (long term). Impacts generally occur some time after the end of the project.
	Example: The deployment of the advanced forecasting system enables each airport to increase maximum passenger capacity by 15% and passenger average throughput by 10%, leading to a 28% reduction in infrastructure expansion costs.
Milestone	Control points in the project that help to chart progress. Milestones may correspond to the achievement of a key result, allowing the next phase of the work to begin. They may also be needed at intermediary points so that, if problems have arisen, corrective measures can be taken. A milestone may be a critical decision point in the project where, for example, the consortium must decide which of several technologies to adopt for further development. The achievement of a milestone should be verifiable.
Objectives	The goals of the work performed within the project, in terms of its research and innovation content. This will be translated into the project's results. These may range from tackling specific research questions, demonstrating the feasibility of an innovation, sharing knowledge among stakeholders on specific issues. The nature of the objectives will depend on the type of action, and the scope of the topic.
Outcomes	The expected effects, over the medium term, of projects supported under a given topic. The results of a project should contribute to these outcomes, fostered in particular by the dissemination and exploitation measures. This may include the uptake, diffusion, deployment, and/or use of the project's results by direct target groups. Outcomes generally occur during or shortly after the end of the project.
	Example: 9 European airports adopt the advanced forecasting system demonstrated during the project.
Pathway to impact	Logical steps towards the achievement of the expected impacts of the project over time, in particular beyond the duration of a project. A pathway begins with the projects' results, to their dissemination, exploitation and communication, contributing to the expected outcomes in the work programme topic, and ultimately to the wider scientific, economic and societal impacts of the work programme destination.
Research output	Results generated by the action to which access can be given in the form of scientific publications, data or other engineered outcomes and processes such as software, algorithms, protocols and electronic notebooks.

Results	What is generated during the project implementation. This may include, for example, knowhow, innovative solutions, algorithms, proof of feasibility, new business models, policy recommendations, guidelines, prototypes, demonstrators, databases and datasets, trained researchers, new infrastructures, networks, etc. Most project results (inventions, scientific works, etc.) are 'Intellectual Property', which may, if appropriate, be protected by formal 'Intellectual Property Rights'. Example: Successful large-scale demonstrator: trial with 3 airports of an advanced forecasting system for proactive airport passenger flow management.
Technology Readiness Level	See EIC Work Programme under Glossary section

Guidance on the use of generative AI tools for the preparation of the proposal

When considering the use of generative artificial intelligence (AI) tools for the preparation of the proposal, it is imperative to exercise caution and careful consideration. The AI-generated content should be thoroughly reviewed and validated by the applicants to ensure its appropriateness and accuracy, as well as its compliance with intellectual property regulations. Applicants are fully responsible for the content of the proposal (even those parts produced by the AI tool) and must be transparent in disclosing which AI tools were used and how they were utilized.

Specifically, applicants are required to:

- Verify the accuracy, validity, and appropriateness of the content and any citations generated by the AI
 tool and correct any errors or inconsistencies.
- Provide a list of sources used to generate content and citations, including those generated by the AI tool. Double-check citations to ensure they are accurate and properly referenced.
- Be conscious of the potential for plagiarism where the AI tool may have reproduced substantial text from other sources. Check the original sources to be sure you are not plagiarizing someone else's work.
- Acknowledge the limitations of the AI tool in the proposal preparation, including the potential for bias, errors, and gaps in knowledge.

TITLE OF THE PROPOSAL

[This document is tagged. Do not delete the tags; they are needed for processing.] #@APP-FORM-HEEICPACH@#

1. Excellence #@REL-EVA-RE@#

Excellence – aspects to be taken into account.

- Objectives and relevance to the Challenge: How clear are the project's objectives? How
 relevant are they in contributing to the overall goal and the specific objectives of the
 Challenge?
- Novelty: To what extent is the proposed work ambitious and goes beyond the state-of-theart?
- Plausibility of the methodology: How sound is the proposed methodology, including the
 underlying concepts, models, assumptions, appropriate consideration of the gender
 dimension in research content, and the quality of open science practices?
- 1 The following aspects will be taken into account only to the extent that the proposed work is within the scope of the work programme topic.

1.1 Objectives and relevance to the Challenge #@PRJ-OBJ-PO@#

- Describe the objectives of the project, which should be clear, plausible, measurable, verifiable and realistically achievable within the duration of the project.
- Explain how the project's objectives contribute to the overall goal and the specific objectives of the
 Challenge, and specify explicitly which objectives or aspects of objectives of the Challenge are
 addressed, taking into account also the information in the Challenge Guide.
- Address how the Specific Conditions for this Challenge (see Work Programme) are met in your proposal.
- For information purposes, indicate how your project addresses the categories for portfolio considerations described in the Challenge Guide
 - In the evaluation process, the evaluation committee will establish a list of proposals to be funded, based on the evaluation scores, and on each proposal's contribution to the setting up of a consistent Challenge Portfolio of projects. The evaluation committee will use the categories and portfolio considerations as explained in the Challenge Guide.

#§PRJ-OBJ-PO§#

1.2 Novelty

- Describe in concrete terms the technological breakthroughs of the project.
- Provide description of the relevant state-of-the-art, and discuss the novelty and ambition of the proposed breakthroughs with respect to it.

1.3 Plausibility of methodology #@CON-MET-CM@# #@COM-PLE-CP@#

- Describe and explain the overall methodology including the concepts, models and assumptions that
 underpin your work. Explain how this will enable you to deliver your project's objectives. Refer to the
 high-risk issues you may have identified in the chosen methodology and how you intend to address them.
- Explain how this methodology will enable reaching the objectives within the time span of the project.
 - This section should be presented as a narrative. The detailed tasks and work packages, and the risks and the corresponding mitigation plan are described below under 'Implementation'.
 - ⚠ Where relevant, include how the project methodology complies with the 'do no significant harm' principle as per Article 17 of Regulation (EU) No 2020/852 on the establishment of a framework to facilitate sustainable investment (i.e. the so-called 'EU Taxonomy Regulation'). This means that the methodology is designed in a way it is not significantly harming any of the six environmental objectives of the EU Taxonomy Regulation.
 - If you plan to use, develop and/or deploy artificial intelligence (AI) based systems and/or techniques you must demonstrate their technical robustness. AI-based systems or techniques should be, or be developed to become:
 - technically robust, accurate and reproducible, and able to deal with and inform about possible failures, inaccuracies and errors, proportionate to the assessed risk they pose
 - socially robust, in that they duly consider the context and environment in which they operate
 - reliable and function as intended, minimizing unintentional and unexpected harm, preventing unacceptable harm and safeguarding the physical and mental integrity of humans
 - able to provide a suitable explanation of their decision-making processes, whenever they can have a significant impact on people's lives.
- Explain how expertise and methods from different disciplines will be brought together and integrated in pursuit of your objectives. If you consider that an inter-disciplinary approach is unnecessary in the context of the proposed work, please provide a justification.
- Describe how the gender dimension (i.e. sex and/or gender analysis) is taken into account in the project's
 research and innovation content. If you do not consider such a gender dimension to be relevant in your
 project, please provide a justification.
 - A Note: This section is mandatory except for topics which have been identified in the work programme as not requiring the integration of the gender dimension into R&I content.
 - A Remember that that this question relates to the <u>content</u> of the planned research and innovation activities, and not to gender balance in the teams in charge of carrying out the project.
 - △ Sex and gender analysis refers to biological characteristics and social/cultural factors respectively. For guidance on methods of sex / gender analysis and the issues to be taken into account, please refer to https://ec.europa.eu/info/news/gendered-innovations-2-2020-nov-24 en
- Describe how appropriate open science practices are implemented as an integral part of the proposed methodology. Show how the choice of practices and their implementation are adapted to the nature of your work, in a way that will increase the chances of the project delivering on its objectives. If you believe that none of these practices are appropriate for your project, please provide a justification here.

- ⚠ Open science is an approach based on open cooperative work and systematic sharing of knowledge and tools as early and widely as possible in the process. Open science practices include early and open sharing of research (for example through preregistration, registered reports, preprints, or crowd-sourcing); research output management; measures to ensure reproducibility of research outputs; providing open access to research outputs (such as publications, data, software, models, algorithms, and workflows); participation in open peer-review; and involving all relevant knowledge actors including citizens, civil society and end users in the co-creation of R&I agendas and contents (such as citizen science).
- ⚠ Please note that this question does not refer to outreach actions that may be planned as part of communication, dissemination and exploitation activities. These aspects should instead be described below under 'Impact'.
- Research data management and management of other research outputs: Applicants
 generating/collecting data and/or other research outputs (except for publications) during the project
 must provide how the data/ research outputs will be managed in line with the FAIR principles (Findable,
 Accessible, Interoperable, Reusable), addressing the following (the description should be specific to your
 project):

Types of data/research outputs (e.g. experimental, observational, images, text, numerical) and their estimated size; if applicable, combination with, and provenance of, existing data.

Findability of data/research outputs: Types of persistent and unique identifiers (e.g. digital object identifiers) and trusted repositories that will be used.

Accessibility of data/research outputs: IPR considerations and timeline for open access (if open access not provided, explain why); provisions for access to restricted data for verification purposes.

Interoperability of data/research outputs: Standards, formats and vocabularies for data and metadata.

Reusability of data/research outputs: Licenses for data sharing and re-use (e.g. Creative Commons, Open Data Commons); availability of tools/software/models for data generation and validation/interpretation/re-use.

Curation and storage/preservation costs; person/team responsible for data management and quality assurance.

- Proposals selected for funding under Horizon Europe will need to develop a detailed data management plan (DMP) for making their data/research outputs findable, accessible, interoperable and reusable (FAIR) as a deliverable by month 6 and revised towards the end of a project's lifetime.
- For guidance on open science practices and research data management, please refer to the relevant section of the HE Programme Guide on the Funding & Tenders Portal.

 $\verb|#@CON-MET-CM@| # @COM-PLE-CP@| # \$REL-EVA-RE\$| #$

2. Impact #@IMP-ACT-IA@#

Impact – aspects to be taken into account.

- Potential Impact: How credible are the pathways to achieve the expected outcomes and impacts of the Challenge? To what extent would the successful completion of the project contribute to this?
- Innovation potential: How adequate are the proposed measures for protection of results and any other exploitation measures to facilitate future translation of research results into innovations with positive societal, economic or environmental impact? How suitable are the proposed measures for involving and empowering key actors that have the potential to take the lead in translating research into innovations in the future?
- Communication and Dissemination: How suitable are the proposed measures, including communication activities, to maximise expected outcomes and impacts for raising awareness about the project results' potential to establish new markets and/or address global challenges?

In this section you should show how your project could contribute to the impacts described in the Work Programme and in the Challenge Guide, the likely scale and significance of this contribution, and the measures to maximise these impacts. Such measures refer to exploitation, communication and dissemination measures. Some of those can be in the form of Portfolio activities to be carried out with the other projects of the portfolio and the EIC Programme Manager (see also the Challenge Guide for envisaged portfolio objectives and activities, if applicable).

2.1. Potential impact

- Provide a narrative explaining how the project's results are expected to make a difference in terms of impact, beyond the immediate scope and duration of the project. The narrative should include the components below, tailored to your project.
 - (a) Describe the unique contribution your project results would make towards (1) the **outcomes** specified for this Challenge, and (2) the **wider impacts**, in the longer term, specified in the Work Programme and in the Challenge Guide.
 - ⚠ Be specific, referring to the effects of your project, and not R&I in general in this field.
 - ⚠ State the target groups that would benefit. Even if target groups are mentioned in general terms in the work programme, you should be specific here, breaking target groups into particular interest groups or segments of society relevant to this project.
 - The outcomes and impacts of your project may be:
 - Scientific, e.g. contributing to specific scientific advances, across and within disciplines, creating new knowledge, reinforcing scientific equipment and instruments, computing systems (i.e. research infrastructures);
 - Economic/technological, e.g. bringing new products, services, business processes to the market, increasing efficiency, decreasing costs, increasing profits, contributing to standards' setting, etc.
 - Societal, e.g. decreasing CO₂ emissions, decreasing avoidable mortality, improving policies and decision making, raising consumer awareness.

Only include such outcomes and impacts where your project would make a significant and direct contribution. Avoid describing very tenuous links to wider impacts. However, include any potential

negative environmental outcome or impact of the project including when expected results are brought at scale (such as at commercial level). Where relevant, explain how the potential harm can be managed.

- (b) Give an indication of the scale and significance of the project's contribution to the expected outcomes and impacts, should the project be successful. Provide quantified estimates where possible and meaningful.
 - 'Scale' refers to how widespread the outcomes and impacts are likely to be. For example, in terms of the size of the target group, or the proportion of that group, that should benefit over time; 'Significance' refers to the importance, or value, of those benefits. For example, number of additional healthy life years; efficiency savings in energy supply.
 - Explain your baselines, benchmarks and assumptions used for those estimates. Wherever possible, quantify your estimation of the effects that you expect from your project. Explain assumptions that you make, referring for example to any relevant studies or statistics. Where appropriate, try to use only one methodology for calculating your estimates: not different methodologies for each partner, region or country (the extrapolation should preferably be prepared by one partner).
 - Your estimate must relate to this project only the effect of other initiatives should not be taken into account.
- (c) Describe any requirements and potential barriers arising from factors beyond the scope and duration of the project that may determine whether the desired outcomes and impacts are achieved. These may include, for example, other R&I work within and beyond Horizon Europe; regulatory environment; targeted markets; user behaviour. Indicate if these factors might evolve over time. Describe any mitigating measures you propose, within or beyond your project, that could be needed should your assumptions prove to be wrong, or to address identified barriers.
 - Note that this does not include the critical risks inherent to the management of the project itself, which should be described below under 'Implementation'.

2.2 Innovation potential

- Describe the exploitation measures to facilitate future translation of research results into innovations.
 - △ Shortly describe the measures for a plausible path to commercialise the innovations.
 - Beneficiaries must use their best efforts to exploit their results or have them exploited by a third party, in priority those established in a Member State or an Associated country, including through transfer or licensing.
 - ⚠ If exploitation is expected primarily in non-associated third countries, justify by explaining how that exploitation is still in the Union's interest.
- Specify your strategy for the management of intellectual property, foreseen protection measures, such as patents, design rights, copyright, trade secrets, etc. How adequate are they to support exploitation?
 - Clear description of necessary measures to allow future uptake, for instance through an adequate form of protection of the generated Intellectual Property (IP) and an assessment of relevant aspects related to regulation, certification, and standardization is expected.
 - If your project is selected for funding, you will need an appropriate consortium agreement to manage (amongst other things) the ownership and access to key knowledge (IPR, research data

- etc.). Where relevant, these will allow you, collectively and individually, to pursue market opportunities arising from the project.
- If your project is selected, you must indicate the owner(s) of the results (results ownership list) in the final periodic report.

Explain the measures the consortium will implement for involving and empowering key actors (such as excellent early-career researchers or promising high-tech SMEs, including start-ups) that have the potential to take the lead in translating research into innovations.

2.3 Communication and Dissemination #@COM-DIS-VIS-CDV@#

- Describe the foreseen measures and plans for stakeholder and general public engagement and for raising awareness about the project's outcomes, with respect to their potential to establish new markets and/or address global challenges.
 - Project results should include top-level scientific publications in Open Access.
 - Communication¹ measures should promote the project throughout the full lifespan of the project. The aim is to inform and reach out to society and show the activities performed, and the use and the benefits the project will have for citizens. Activities must be strategically planned, with clear objectives, start at the outset and continue through the lifetime of the project. The description of the communication activities needs to state the main messages as well as the tools and channels that will be used to reach out to each of the chosen target groups.
 - All measures should be proportionate to the scale of the project, and should contain concrete actions to be implemented both during and after the end of the project. In the justification, explain why each measure chosen is best suited to reach the target group addressed.
 - In case your proposal is selected for funding, a more detailed 'plan for dissemination and exploitation including communication activities' will need to be provided as a mandatory project deliverable within 6 months after the start of the project. This plan shall be periodically updated in alignment with the project's progress.
 - ⚠ Describe possible feedback to policy measures generated by the project that will contribute to designing, monitoring, reviewing and rectifying (if necessary) existing policy and programmatic measures or shaping and supporting the implementation of new policy initiatives and decisions.

#§COM-DIS-VIS-CDV§# #§IMP-ACT-IA§#

3. Quality and efficiency of the implementation #@QUA-LIT-QL@##@WRK-PLA-WP@#

Quality and efficiency of the implementation – aspects to be taken into account

- Work plan: How coherent and effective are the work plan (work packages, tasks, deliverables, milestones, time-line, etc.) and risk mitigation measures in order to achieve the project objectives?
- Allocation of resources: How appropriate and effective is the allocation of resources (comprising person-months and other cost items) to work packages and consortium

¹ For further guidance on communicating EU research and innovation for project participants, please refer to the Online Manual on the Funding & Tenders Portal

members?

— Quality of the applicant/consortium (depends if mono or multi-beneficiaries)²: To what extent does the applicant/ do all consortium members have the necessary capacity and high quality expertise for performing the project tasks?

3.1 Work plan and allocation of resources #@WRK-PLA-WP@#

Please provide the following:

- brief presentation of the overall structure of the work plan;
- timing of the different work packages and their components (Gantt chart or similar);
 - Please use the below table when planning Reporting Periods for your project:

Project duration	Number of periods	RP1 duration	RP2 duration	RP3 duration	RP4 duration
12	1	12	-	5	-
18	1	18	- ~ ~	-	-
24	2	12	12	1	-
30	2	12	18	1	1
36	2	12	24	-	•
42	3	12	12	18	-
48	3	12	18	18	-
60	4	12	16	16	16

- graphical presentation of the components showing how they inter-relate (Pert chart or similar).
- detailed work description, i.e.:
 - o a list of work packages (table 3.1a);
 - a description of each work package (table 3.1b);
 - a list of deliverables (table 3.1c);
 - Give full details. Base your account on the logical structure of the project and the stages in which it is to be carried out. Each work package should be a substantial part of the work plan, and the number of work packages should be proportionate to the scale and complexity of the project.

² Whether the proposal can be submitted by a single applicant depends on what is specified in the Work Programme for the particular Challenge that this proposal is submitted to.

- Structure each work package by breaking it down into tasks. If tasks are not appropriate, work packages can be organised according to other criteria (e.g., according to the type of work or thematically). For each task or element of the work package, describe all activities to be carried out and quantify them (e.g., number of protocols, tests, measurements, combinations, study subjects, conferences, publications, etc.). Provide enough detail to clarify who will do this work and why it is needed for the project, (e.g., the level of qualification and number of person-months for personnel, as well as the requested equipment, consumables, meetings, etc.)to justify the proposed resources and so that progress can be monitored, including by the Commission.
- A Resources (person-months) assigned to work packages should be in line with their objectives and deliverables. You are advised to include a distinct work package on 'project management', and to give due visibility in the work plan to 'data management' 'dissemination and exploitation' and 'communication activities', either with distinct tasks or distinct work packages.
- You will be required to update the 'plan for the dissemination and exploitation of results including communication activities', and a 'data management plan', (this does not apply to topics where a plan was not required.) This should include a record of activities related to dissemination and exploitation that have been undertaken and those still planned.
- Please make sure the information in this section matches the costs as stated in the budget table in section 3 of the application forms, and the number of person months, shown in the detailed work package descriptions.
- a list of milestones (table 3.1d).
- a list of critical risks, relating to project implementation, that the stated project's objectives may not be achieved. Detail any risk mitigation measures. You will be able to update the list of critical risks and mitigation measures as the project progresses (table 3.1e).
- a table showing number of person months required (table 3.1f)
- a table showing description and justification of subcontracting costs for each participant (table 3.1g)
- a table showing justifications for 'purchase costs' (table 3.1h) for participants where those costs exceed 15% of the personnel costs (according to the budget table in proposal part A)
- if applicable, a table showing justifications for 'other costs categories' (table 3.1i)
- if applicable, a table showing in-kind contributions from third parties (table 3.1j)

3.2 Quality of the applicant/consortium #@CON-SOR-CS@# #@PRJ-MGT-PM@#

- ⚠ The individual participants of the consortium are described in a separate section under Part A. There is no need to repeat that information here.
- Describe the expertise of the consortium (or of the single applicant in case of mono-beneficiary application). Explain how it provides all the necessary knowledge, how it supports the proposed interdisciplinary approach, and how it matches the project's objectives and tasks. Explain the role of each consortium member and its complementary contribution. If appropriate, show how this includes

expertise in social sciences and humanities, open science practices, and gender aspects of R&I. Include in the description affiliated entities and associated partners, if any.

- Demonstrate that the partners will have access to critical infrastructure needed to carry out the project's activities (or of the single applicant in case of mono-beneficiary application).
- In what way does each of the partners contribute to the project? Show that each has a valid role, and adequate resources in the project to fulfil that role.
- If applicable, describe the industrial/commercial involvement in the project to ensure exploitation of the results and explain why this is consistent with and will help to achieve the specific measures which are proposed for exploitation of the results of the project (see section 2.2).
- Other countries and international organisations: If one or more of the participants requesting EU funding is based in a country or is an international organisation that is not automatically eligible for such funding (entities from Member States of the EU, from Associated Countries and from one of the countries in the exhaustive list included in Annex 3 of the EIC Work Programme are automatically eligible for EU funding), .tial to explain why the participation of the entity in question is essential to successfully carry out the project.

Tables for section 3.1

⚠ Use plain text for the tables in section 3.1. If the proposal is invited to start Grant Agreement preparation, these tables will have to be encoded in the grant management IT tool, where no graphics or special formats are supported.

Table 3.1a: List of work packages

Work package No	Work package Title	Lead Participant No	Lead Participant Short Name	Name & surname of Work package leader	Gender of Work package leader	Start Month	End month
						>	
					18/		
				ζ.	18		
		. Kample	ROLLO	Se			

Table 3.1b: Work package description

For each work package:

Work package number	
Work package title	

A Participants involved in each WP and their efforts are shown in table 3.1f. Lead participant and starting and end date of each WP are shown in table 3.1a.)

Objectives
Description of work (where appropriate, broken down into tasks), lead partner and role of participants. For each task, quantify the amount of work. Provide enough detail to justify the resources requested and clarify why the work is needed and who will do it. Deliverables linked to each WP are listed in table 3.1c (no need to repeat the information here).
ROLL
Example, not le

Table 3.1c: List of Deliverables³

Only include deliverables that you consider essential for effective project monitoring.

Number	Deliverable name	Short description	Work package number	Short name of lead participant	Туре	Dissemin ation level	Delivery date (in months)

KEY

Deliverable numbers in order of delivery dates. Please use the numbering convention <WP number>.<number of deliverable within that WP>.

For example, deliverable 4.2 would be the second deliverable from work package 4.

Type:

Use one of the following codes:

R: Document, report (excluding the periodic and final reports)

DEM: Demonstrator, pilot, prototype, plan designs

DEC: Websites, patents filing, press & media actions, videos, etc.

DATA: Data sets, microdata, etc. DMP: Data management plan

ETHICS: Deliverables related to ethics issues. SECURITY: Deliverables related to security issues

OTHER: Software, technical diagram, algorithms, models, etc.

Dissemination level:

Use one of the following codes:

PU – Public, fully open, e.g. web (Deliverables flagged as public will be automatically published in CORDIS project's page)

SEN - Sensitive, limited under the conditions of the Grant Agreement

Classified R-UE/EU-R - EU RESTRICTED under the Commission Decision No2015/444

Classified C-UE/EU-C – EU CONFIDENTIAL under the Commission Decision No2015/444

Classified S-UE/EU-S – EU SECRET under the Commission Decision No2015/444

Delivery date

Measured in months from the project start date (month 1)

You must include a data management plan (DMP) and a 'plan for dissemination and exploitation including communication activities as distinct deliverables within the first 6 months of the project. The DMP will evolve during the lifetime of the project in order to present the status of the project's reflections on data management. A template for such a plan is available in the Online Manual on the Funding & Tenders Portal.

Table 3.1d: List of milestones

Milestone number	Milestone name	Related work package(s)	Due date (in month)	Means of verification

KEY

Due date

Measured in months from the project start date (month 1)

Means of verification

Show how you will confirm that the milestone has been attained. Refer to indicators if appropriate. For example: a laboratory prototype that is 'up and running'; software released and validated by a user group; field survey complete and data quality validated.

Table 3.1e: Critical risks for implementation #@RSK-MGT-RM@#

Description of risk (indicate level of (i)	Work package(s)	Proposed risk-mitigation measures
likelihood, and (ii) severity:	involved	
Low/Medium/High)	1,40	
	2. 4	

Definition critical risk:

A critical risk is a plausible event or issue that could have a high adverse impact on the ability of the project to achieve its objectives.

Level of likelihood to occur: Low/medium/high

The likelihood is the estimated probability that the risk will materialise even after taking account of the mitigating measures put in place.

Level of severity: Low/medium/high

The relative seriousness of the risk and the significance of its effect.

#§RSK-MGT-RM§#

Table 3.1f: Summary of staff effort

Please indicate the number of person/months over the whole duration of the planned work, for each work package, for each participant. Identify the work-package leader for each WP by showing the relevant person-

month figure in bold.

	WPn	WPn+1	WPn+2	Total Person- Months per Participant
Participant Number/Short Name				
Participant Number/ Short Name				
Participant Number/ Short Name				
Total Person Months				

Table 3.1g: 'Subcontracting costs' items

For each participant describe and justify the tasks to be subcontracted (please note that core tasks of the project should not be sub-contracted).

Participant Number/Shor	t Name	
	Cost (€)	Description of tasks and justification
Subcontracting		

Table 3.1h: 'Purchase costs' items (travel and subsistence, equipment and other goods, works and services)

Please complete the table below for each participant if the purchase costs (i.e. the sum of the costs for 'travel and subsistence', 'equipment', and 'other goods, works and services') exceeds 15% of the personnel costs for that participant (according to the budget table in proposal part A). The record must list cost items in order of costs and starting with the largest cost item, up to the level that the remaining, costs are below 15% of personnel costs.

Participant Number/Shor	Participant Number/Short Name				
	Cost (€)	Justification			
Travel and subsistence					
Equipment					
Other goods, works and					
services					
Remaining purchase					
costs (<15% of pers.					
Costs)					
Total					

Table 3.1i: 'Other costs categories' items (e.g. internally invoiced goods and services)

Please complete the table below for each participant that would like to declare costs under other costs categories (e.g. internally invoiced goods and services), irrespective of the percentage of personnel costs.

Participant Number/Short Name				
	Cost (€)	Justification		
Internally invoiced

ANNEXES TO PROPOSAL PART B

Some calls may ask to upload annexes to proposal part B. The annexes must be uploaded as separate documents in the submission system. The most common annexes to be uploaded in Horizon Europe are (standard templates are published in the Funding & Tenders portal):

- DETAILED BUDGET TABLE: Annex with information for estimation of lump sum funding.
- CLINICAL TRIALS: Annex with information on clinical trials
- FINANCIAL SUPPORT TO THIRD PARTIES: Annex with information on financial support to third parties.
- CALLS FLAGGED AS SECURITY SENSITIVE: Annex with information on security aspects.
- ETHICS: ethics self-assessment should be included in proposal part A. However, in calls where several serious ethics issues are expected, the character limited in this section of proposal part A may not be sufficient for participants to give all necessary information. In those cases, participants may include additional information in an annex to proposal part B.
