

Project Application - Jakub Mitura

The Project

Project details

Project title: Not provided

Project summary (abstract):

Not provided

Explain the scientific case of the project for which you intend to use the code(s):

Not provided

Keywords:

Not provided

Instructions: Not provided

Proposal for civilian purposes: Not provided

Is any part of the project confidential?: Not provided

AI set of technologies selection: Not provided

Submission details

Project duration: Not provided

Preferable starting date: Not provided

Industry involvement: Not provided

Public sector involvement: Not provided

Principal Investigator

Personal information

Gender: Not provided

Title: Not provided

First (given) name: Not provided

Last (family) name: Not provided

Initials: Not provided

Date of birth: Not provided

E-mail address: Not provided

Secondary e-mail address: Not provided

Nationality: Not provided

Phone Number: Not provided

Job title: Not provided

Employment contract valid for more than 3 months after end allocation: Not provided

Website: Not provided

Organization details

Instructions: Not provided

Organization name: Not provided

Organization type: Not provided

Organization with research activity: Not provided

Organization head office is located in Europe: Not provided

Percentage of R&D in Europe vs total R&D: Not provided

Organization department: Not provided

Organization group: Not provided

Organization address: Not provided

Organization postal code: Not provided

Organization city: Not provided

Organization country: Not provided

Contact Person and Team Members Information

Contact Person

First (given) name: Not provided

Last (family) name: Not provided

E-mail address: Not provided

divider: Not provided

Partitions

Code Details and Development

Instructions: Not provided

Development of the code(s) description:

Not provided

Scalability and performance

Describe the scalability of the application and performance of the application:

Not provided

What is the target for scalability and performance?:

Not provided

Optimization of the work proposed

Explain how the optimization work proposed will contribute to future Tier-0 projects:

Not provided

Describe the impact of the optimization work proposed - is the code widely used; can it be used for other research projects and in other research fields with minor modifications; would these modifications be easy to add to the main release of the software?:

Not provided

Describe the main algorithms and how they have been implemented and parallelized:

Not provided

Performance

Main performance bottlenecks:

Not provided

Describe possible solutions you have considered to improve the performance of the project:

Not provided

Describe the application enabling/optimization work that needs to be performed to achieve the target performance:

Not provided

Which computational performance limitations do you wish to solve with this project?:

Not provided

Application Support Team (AST)

Instructions: Not provided

Does your proposal require assistance from an AST on the selected partition(s)? : Not provided

Is your proposal a follow up of another submitted Epicure project to use EuroHPC quota for providing application support? : Not provided

Eligibility Confirmation and Data Consent

Eligibility confirmation

Instructions: Not provided

I confirm that the Principal Investigator and Team Members are affiliated with organizations listed on the Horizon 2020 countries list.: Not provided

I confirm that the submitted information is correct and complete and comply for the entire duration of the action with the eligibility criteria set out in the call conditions.: Not provided

Data consent

Instructions: Not provided

space: Not provided

In case the proposal is awarded, EuroHPC JU would like to publish the Principal Investigator's and Team Members' names and organizations. This may involve sharing this information on our website, social media channels, or in other promotional materials related to the project. Please provide your consent below.: Not provided

In order to submit the proposal, you must accept the terms and conditions stated in the Access Policy, hence confirming that you have read and understood the call procedures. The documentation can be found at https://eurohpc-ju.europa.eu/eurohpc-ju-call-proposals-development-access_en: Not provided
