

Project Application - Jakub Mitura

The Project

Project details

Project title: Not provided

Project summary (abstract):

Not provided

Keywords:

Not provided

Instructions: Not provided

Proposal for civilian purposes: Not provided

Is any part of the project confidential?: Not provided

Does your proposal involve handling of personal data?: Not provided

Instructions: Not provided

Submission details

Type of submission: Not provided

Industry, academia and public sector involvement

Industry involvement: Not provided

Academic involvement: Not provided

Public sector involvement: Not provided

Principal Investigator

Personal information

Gender: Not provided

Title: Not provided

First (given) name: Not provided

Last (family) name: Not provided

Initials: Not provided

Date of birth: Not provided

E-mail address: Not provided

Secondary e-mail address: Not provided

Nationality: Not provided

Phone number: Not provided

Job title: Not provided

Employment contract valid for more than 3 months after end allocation: Not provided

Website: Not provided

Organization details

Instructions: Not provided

Organization name: Not provided

Organization type: Not provided

Organization with research activity: Not provided

Organization head office is located in Europe: Not provided

Percentage of R&D in Europe vs total R&D: Not provided

Organization department: Not provided

Organization group: Not provided

Organization address: Not provided

Organization postal code: Not provided

Organization city: Not provided

Organization country: Not provided

Track record of the PI

Granted patents and other measures for the relevance of the work:

Not provided

Prior allocation history in EuroHPC, PRACE, national calls, as well as international programs such as INCITE of the US DoE:

Not provided

Participation of team members in other European Commission (EC) actions, such as ERC or Marie Skłodowska-Curie EC grants, etc.:

Not provided

Previous presentations at EuroHPC Summit, EuroHPC User day or PRACE days:

Not provided

Contact Person and Team Members

Contact person

First (given) name: Not provided

Last (family) name: Not provided

E-mail address: Not provided

divider: Not provided

Partitions

Instructions: Not provided

Partition information

Partition name:

Not provided

Requested amount of resources (node hours): Not provided

Code(s) used: Not provided

Jobs

Number of jobs simultaneously: Not provided

Wall clock time of a typical job execution (hours): Not provided

Checkpoints

Are you able to write checkpoint?: Not provided

Maximum time between 2 checkpoints (hours): Not provided

Desirable maximum time between 2 checkpoints (hours): Not provided

Cores/nodes

Average # GPUs to be used per job: Not provided

Maximum # GPUs to be used per job: Not provided

GPUs used per node: Not provided

Maximum # CPU cores per job: Not provided

Maximum number of jobs running simultaneously on the GPU partition: Not provided

Average # CPU cores per job: Not provided

of CPU cores used per node: Not provided

Memory

Minimum job memory (total usage over all nodes in GB): Not provided

Average job memory (total usage over all nodes in GB): Not provided

Maximum job memory (total usage over all nodes in GB): Not provided

Storage

Maximum amount of SCRATCH needed at a time (TB): Not provided

Maximum amount of WORK needed at a time (TB): Not provided

Maximum amount of HOME needed at a time (TB): Not provided

Maximum amount of ARCHIVE needed at a time (TB): Not provided

Maximum # files to be stored on SCRATCH (thousands): Not provided

Maximum # files to be stored on WORK (thousands): Not provided

Maximum # files to be stored on HOME (thousands): Not provided

Maximum # files to be stored on ARCHIVE (thousands): Not provided

Total amount of data to transfer to/from (TB): Not provided

Justification of data transfer:

Not provided

I/O Strategy:

Not provided

I/O

I/O data traffic R/W per hour: Not provided

I/O files generated per hour: Not provided

Specify if you would need to transfer the data to/from any of the following external data repositories or through data transfer federations: Not provided

Code details, Development and Data management

Instructions: Not provided

Workflows

Please describe the workflows you will be using:

Not provided

Will you be using containerized solution? : Not provided

If the project develops an AI model/method/software/workflow will it be available as open source?: Not provided

Please provide a monthly plan of CPU/GPU resource usage by the project:

Not provided

Scalability and performance

Describe the scalability and performance of the application:

Not provided

Do you face bottlenecks in your AI solution? If yes select the type below:: Not provided

Data details

Is the data used in the project open for communities?: Not provided

Will the generated data by the project (if any) be open to other communities?: Not provided

Application Support Team (AST)

Instructions: Not provided

Does your proposal require assistance from an AST on the selected partition(s)?: Not provided

Collaboration and Funding

Instructions: Not provided

Select one or more funding options applicable to this project: Not provided

Dissemination Strategy

Instructions: Not provided

Dissemination strategy description:

Not provided

Ethics Self-Assessment

Instructions: Not provided

Respect for Human Agency

Please describe how your system ensures that end-users have the ability to control vital decisions about their own

lives:

Not provided

Privacy & Data Governance

Please describe how data is collected and processed from the aspect of lawfulness, fairness and transparency:

Not provided

What measures (such as anonymization, pseudonymisation, encryption, and aggregation) you took to safeguard the rights of data subjects?:

Not provided

Please describe the measures you employ to prevent data breaches and leakages:

Not provided

Fairness

How do you ensure avoiding algorithmic bias, in input data, modelling and algorithm design?:

Not provided

Individual, and Social and Environmental Well-being

If relevant, describe how the AI system is mindful of all stakeholders and the environment:

Not provided

Transparency

Are the end-users aware that they are interacting with an AI system?: Not provided

Please describe how the participants and/or end-users will be informed about interacting with an AI system, and about its purpose, capabilities, limitations, benefits and risks:

Not provided

Accountability

Please describe how your system ensures that potential ethically and socially undesirable effects will be detected, stopped, and prevented from reoccurring:

Not provided

Excluded Reviewers

Excluded Reviewer #1

Full Name: Not provided

E-mail: Not provided

Affiliation: Not provided

Excluded Reviewer #2

Full Name: Not provided

E-mail: Not provided

Affiliation: Not provided

Excluded Reviewer #3

Full Name: Not provided

E-mail: Not provided

Affiliation: Not provided

Data Consent

Instructions: Not provided

space: Not provided

In case the proposal is awarded, EuroHPC JU would like to publish the Principal Investigator's and Team Members' names and organizations. This may involve sharing this information on our website, social media channels, or in other promotional materials related to the project. Please provide your consent below.: Not provided

In order to submit the proposal, you must accept the call's Terms of Reference available as a document at https://www.eurohpc-ju.europa.eu/eurohpc-ju-call-proposals-ai-science-and-collaborative-eu-projects_en. By ticking the box below you confirm that you have read and understood the terms and conditions of the call.: Not provided

space: Not provided

In case the proposal is recommended to be awarded but due to the first-come-first-serve principle is not funded, do you agree on moving your proposal to the next cut-off period with a priority in funding?: Not provided

Administrative self-assessment checklist

Administrative self-assessment checklist

PI CV uploaded (most recent): Not provided

Correct Project Scope and Plan template used: Not provided

Maximum page limit of the Project Scope and Plan respected (10 pages): Not provided

All sections of the Project Scope and Plan are completed: Not provided

Total amount of resources in the milestones table (section 3.2) matches the resources requested in the online form (Partitions): Not provided
